رؤية VISION 2030

المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA

ABOUT COMPANY

The company was established in the contracting sector by a team of highly skilled engineers and technicians, capable of providing specialized solutions for general construction and finishing projects.

What sets us apart is our commitment to delivering more than just building solutions—we focus on fulfilling the vision of our clients. We are dedicated to providing reliable, highly professional services.

With our distinguished team, expertise, and skill sets, we confidently handle numerous complex and challenging projects in both the public and private sectors.

Safety, of the highest standards, is our top priority and is aligned with both local and international standards. Through the quality of our work, we aim to rapidly expand within the local market.

OUR VISION

With both practical and theoretical experience, we fully understand our clients' needs and work diligently to achieve their goals in the fields of investment and real estate development, as well as all associated works.

We are committed to completing every project on time and within budget by working closely with the owner and engineers to achieve the projects key objectives.

We strive to build strong relationships with our clients, based on integration and professional services, ensuring that projects are completed according to clients expectations, on time, and to the best specifications. We are committed to the highest standards of service and performance in the fields of civil construction, maintenance, and operations, in line with Saudi Arabia's Vision 2030. We believe that success can only be achieved through teamwork between skilled technicians and specialized administrators who share a common goal: the success of the project and the achievement of our clients objectives.

Experienced leadership is one of the key elements that ensures client satisfaction and mutual success in all our projects.

OUR MISSION

At our company, we are committed to delivering highly precise and specified projects, starting from the first moment, even before the commencement of any project. We ensure a comprehensive theoretical study of the plans, feasibility studies, and meticulous evaluation of engineers and subcontractors.

Upon initiating the actual work, we carefully prepare the plans, examine the required specifications, and create an optimal working environment to ensure the project is completed to the highest standards. Each project is overseen by efficient management to ensure smooth workflow and the achievement of defined objectives on time and within the set budget.

PUBLIC SAFETY IN THE ORGANIZATION

the management of the organization places public safety as a top priority. The safety officer oversees the implementation of safety measures at each work site, with direct supervision to ensure all necessary procedures are followed.

Regular training is conducted for all employees at the work sites to guarantee compliance with the highest safety standards.

Weekly meetings are held between the organization's personnel and subcontractors to review and reaffirm compliance with public safety, ensuring that the highest safety standards are maintained in all activities.

VALUES

QUALITY

Providing services that exceed customer expectations in terms of quality and detail

INNOVATION

Utilizing modern construction techniques and methods to improve the effectiveness and efficiency of operations

SUSTAINABILITY

Working on projects that contribute to environmental protection and promote economic sustainability

Delivering innovative and functional commercial spaces that drive business success and growth.

03

RESIDENTIAL PROJECTS

Designing and building beautiful, comfortable homes tailored to modern lifestyles and family needs.

AMCC

COMPANY SECTORS

DESIGN ENGINEERS

Creative and technical engineering solutions that transform vision into executable, structurally sound, and efficient architectural designs.

FACADE WORKS

Expert facade solutions that enhance building aesthetics, durability, and performance using premium materials and advanced techniques.

INTERIOR & EXTERIOR FINISHING

High-quality interior and exterior finishing services that bring functionality, elegance, and lasting value to every space.

CONSTRUCTION & LANDSCAPING

Comprehensive construction and landscaping services that build strong structures and sustainable outdoor spaces.

INTEGRATED WATER SOLUTIONS

Our Water Solutions department provides integrated expertise across wellness, landscape, and water treatment. We offer end-to-end design, engineering, and execution for water solution projects, combining functionality, aesthetics, sustainability, and performance. From luxury wellness facilities, swimming pools, and water features to advanced water and wastewater treatment systems, we deliver tailored solutions from concept and design through construction, commissioning, and after-sales support.

ENGINEERING DESIGN

Our Engineering Design services deliver innovative, efficient, and sustainable solutions tailored to each project's unique requirements. We combine technical expertise, advanced technology, and creative problem-solving to transform ideas into practical, high-performance designs.

Our team of experienced engineers and designers work collaboratively across all disciplines, including architectural, structural, mechanical, electrical, and infrastructure design, ensuring fully integrated and cost-effective solutions.

From concept development and feasibility studies to detailed design and construction documentation, we ensure accuracy, safety, and compliance with international standards. Our focus is on delivering designs that enhance functionality, optimize performance, and add long-term value to every project.

CONSTRUCTION & LANDSCAPING

Our company is dedicated to delivering large-scale and complex construction and landscaping projects across the region. With a focus on structural execution, we blend innovative construction techniques with precision to create iconic developments.

In the Construction sector, our expertise ranges from detailed concrete formwork to complete facade systems, as seen in our current multi-story structure under development, where raw materials are meticulously assembled into a robust, modern design.

Parallel to this, our Landscaping division transforms spaces into curated environments. Our projects include expansive hardscapes, intricate water features, and complex pool courtyards, as demonstrated by the detailed overhead view of our high-end residential complex featuring bespoke pool designs and terraced gardens.

We manage every project with a full, comprehensive plan, ensuring quality control from kickoff to final delivery. Our commitment to distinctive architecture, durable materials, and full compliance with international standards, for excellence.

CONSTRUCTION & LANDSCAPING

Nasiriyah Private Palace

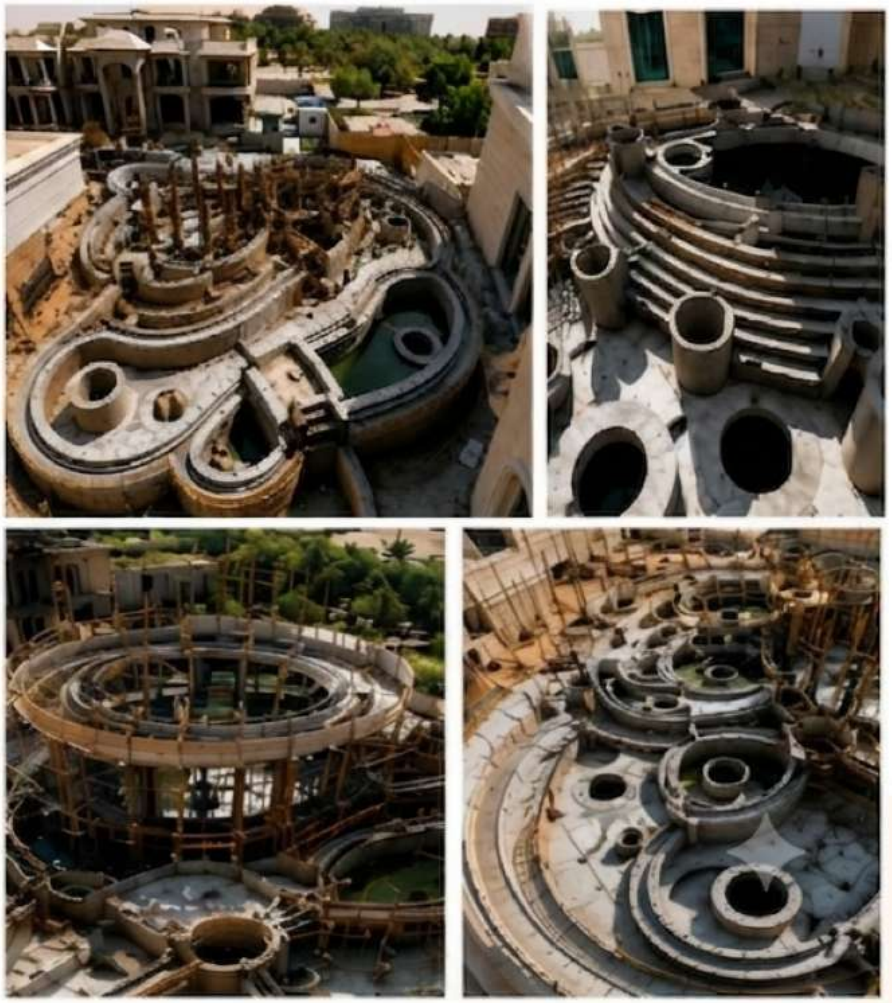

KINGDOM OF SAUDI ARABIA

The complex landscaping design for the Nasiriyah Private Palace demanded meticulous construction execution to realize its advanced water-centric vision. AMCC's team managed the entire process from structural formwork to final integration.

The four-image grid on the right highlights key phases of this extensive project, showcasing the scale of the reinforced concrete structures and the integration of diverse water features within a cohesive garden layout.

Top-down aerial views illustrate the elaborate, interconnected pool systems and tiered water gardens, while ground-level perspectives emphasize the finished depth and quality of the tiered concrete levels.

These details, coupled with the sophisticated multi-level terraces and water features seen in construction, demonstrate a commitment to innovative construction techniques that deliver a sense of timeless tranquility for the palace grounds.

CONSTRUCTION & LANDSCAPING

NATIONAL GUARD HOUSING PROJECT

KINGDOM OF SAUDI ARABIA

AMCC successfully executed the complete structural, architectural, infrastructure, and external works for the National Guard Housing Project in the Kingdom of Saudi Arabia. The scope included **Precast concrete structure**,
